

# Fiber Laser Engraving Machine

Power : 20W

## Specifications

Applicable Material	Metal Nonmetal Materials	Laser source	Raycus Laser Source
Laser Power	20W	Keywords	Laser Marking Machine
Laser wavelength	1064nm	Marking Area	100mm-300mm
Type	Fiber Laser	Marking Speed	0-8000mm/s
Power	220V		

### Field Lens

Compact size, suitable for harsh environment to provides precision laser Standard 110\*110 marking area. Optional 150\*150mm, 200\*200mm 300\*300mm etc.

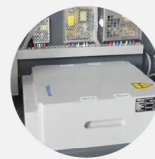

### Galvo Lens

Equipped with automatic scanning system, friendly operation process. With 7000mm/s marking speed, 0.001mm repeat precision.

### Control Board & Ezcad Software

Humanized design, the modular division of the various controllers simple operation, high security.

### Laser Source

Brand : Max  
Raycus High performance  
Power optional

### Switch Button

Humanized control system, easy to learn, Safe & convenient. Dust proof design.

### Air Cooling System

The Air-cooling system is used to speed up heat dissipation protect the host, and ensure the machine operates for a long time.
